TefTEC™ Series Filter Cartridges

Absolute Rated PTFE Membrane Filter Cartridges

TefTEC cartridge filters are constructed with naturally hydrophobic PTFE membrane and polypropylene support layers and components. The HIMA retentive PTFE membrane offers superior hydrophobicity and water intrusion resistance compared to PVDF and polypropylene membranes, and the cartridge construction offers a cost-effective alternative to all-fluorocarbon filters. TefTEC filters are ideal for gas/vent applications and the filtration of aggressive chemicals and solvents.

FEATURES & BENEFITS
• High surface area, single-layer construction provides superior flow rates and minimizes filtration system size
• 100% Flushed with 18 MΩ-cm DI water and integrity tested
• Filters are manufactured, flushed, tested and packaged in an ISO Class 7 Cleanroom Environment
• Each filter element stamped with pore size, lot and serial number for identification and traceability
• Complete qualification guide available
• Available prewet for use with aqueous based chemicals

CERTIFICATIONS
• USP Class VI: Meets USP Class VI Biological Test for Plastics
• FDA Listed Materials: All materials comply with FDA Title 21 of the Code of Federal Regulations Sections 174.5, 177.1520, and 177.1550 as applicable for food and beverage contact.

TYPICAL APPLICATIONS
• Aggressive chemicals
• Strong acids/bases
• Solvents
• Tank Vents
• Compressed gases
• Photoresists
• Hot DI water
• Pharmaceutical Intermediates
• Fermentation air

PERFORMANCE SPECIFICATIONS
• Steam/Autoclave: Cartridges will withstand at least 100 steam/autoclave thirty-minute cycles @ 275°F (135°C)

*Available only for DOE (P) configuration

---

**TEFTEC FLOW RATE**

**Typical Flow Rate Clean Water at Ambient Temperature (per 10" cartridge)**

![Graph showing typical flow rate clean water at ambient temperature](image)

For liquids other than water, multiply pressure drop by the fluid viscosity in centipoise.

---

**TEFTEC AIR FLOW RATE**

**Air Flow Rate (per 10" cartridge)**

![Graph showing air flow rate](image)

Test conditions: System pressure at 30 psig, 65°F (18°C), outlet open to atmosphere.

---

**INTEGRITY TEST SPECIFICATIONS**

Air Diffusion per 10-inch cartridge wet with 60/40 IPA/water. Contact Graver Technologies for specific method.
