Ecosorb® S-426

Ecosorb® S-426 is a moist, non-dusting, multi-functional purification media that combines adsorption, filtration, and ion exchange capacity into a single product. Ecosorb products utilize a proprietary method to affix fine particles of activated carbon and ion exchange resin onto an inert support. By combining the superior kinetics of fine particles with excellent flow characteristics, purification processes run longer and deliver better quality effluents than with standard treatment methods.

S-426 is recommended for liquid sugar processing for soft drink bottling plants for color and taste and odor reduction. Also suitable for other food applications where a moderately low pH can be tolerated. S-426 is extremely efficient in removing both color and taste and odor compounds.

Ecosorb S-426 can be used either in a traditional slurry (batch or continuous) mode or as a precoat. Depending on the application, 200 to 500% increases in filter cycle throughput and 50 to 90% reductions in solid waste are typical compared to traditional PAC (powdered activated carbon) treatment.

Typical Properties

Appearance:	Moist powder aggregates
Color:	Predominantly black with some white flecks
Functional	Powdered Activated Carbon
Components:	Powdered Anion Exchange Resin Chloride Form Cellulose Fiber
pH:	4.0 – 6.0
Total Moisture:	60% ± 3%
Permeability (v/v):	40% minimum

Ecosorb S series products comply with all applicable U.S. Food CODEX requirements

Ecosorb S series products are certified as Kosher and Pareve

Ecosorb S series products are HALAL certified

Shelf Life: One year from date of Manufacture

Packaging: 30 lbs per bag/40 bags per pallet
